INTRODUCTION TO NETWORK

Tasks

1.Draw a simple diagram (hand-drawn or digital) showing how your phone connects to Instagram, including your device, WiFi router, ISP, and Instagram server. Label each part and the connections.

ANS: Explanation

1. Mobile Phone: I open Instagram.
2. WiFi Router: Connects my phone to WiFi.
3. ISP: Provides internet service.
4. Instagram Server: Sends photos, videos, and messages to my phone.

2.List 5 devices you use or see daily that are part of a network (for example: smartphone, smart TV, WiFi router, laptop, smartwatch). For each, write what type of network it connects to (LAN, WAN, PAN, etc.)

ANS:

- Smartphone: Connects to mobile internet or WiFi.
- Smart TV: Connects to WiFi to watch online videos.
- WiFi Router: Connects devices to the local network.
- Laptop: Connects to WiFi or LAN cable.
- Smartwatch: Connects to a phone using Bluetooth.

3.Explain the difference between the Internet and an intranet using an example from your college or a public WiFi you have used.

ANS: 1. Internet:

- Internet is a worldwide network.
- Anyone can use it with an internet connection.
- Example: Using Google, YouTube, and Instagram on college WiFi.

2. Intranet:

- Intranet is a private network.
- Only authorised people can access it.
- Example: My college's internal student or staff portal.

**4.Pick any one app you use (like WhatsApp, Zomato, or Flipkart) and describe, in 4-5 lines, how data travels from your device to their server and back when you perform a search inside the app.

Hint: Mention the devices and networks involved, and what happens when you hit 'search'.**

ANS: STEPS

1. Open WhatsApp on your mobile phone.
2. Type a contact name in the search box.
3. Click the Search button.
4. Your phone sends the request through WiFi or mobile data.
5. The ISP sends the request to the WhatsApp server.
6. The server searches for the contact.
7. The server sends the result back to your phone.
8. The contact appears on your screen.
